

Husqvarna K 760

The Husqvarna K 760 has long been a highly popular all-round power cutter among construction workers and landscapers. By improving a number of large and small details, we've made the machine even more powerful, efficient, reliable and comfortable.

OPTIMISED PERFORMANCE

The new cylinder increases the cutter's capacity in several ways. It delivers more efficient combustion, which combined with extra cooling fins reduces exhaust emissions by 15 %. Also, it ensures an optimal running temperature, making the machine less sensitive to variations in climate and fuel.

REDUCED VIBRATIONS

Reduced vibrations, below 2.5 m/s², thanks to the new blade guard which means that you can work full days without having to take a break.

NEW ACTIVE AIR FILTRATION™

A unique air filtration system consisting of three separate filters that increase the service life of the engine and reduces downtime and service costs. One of the most efficient systems on the market.

DURASTARTER™

Patented, dust sealed starter unit with a sealed return spring and pulley bearing. DuraStarter™ also includes a starter cord with greatly increased durability. This makes the starter virtually maintenance free, further enhancing the reliability of our cutters.

Features Husqvarna K 760

- SmartCarb, a built-in automatic filter compensation, maintains high power and lowers fuel consumption.
- Our anti-vibration system reduces vibrations in the cutter handles, so they are more comfortable to hold and can be used for longer periods. To provide the user a comfortable operating position and to reduce strain, the distance between the handles is large. The handles and the short engine body mean the user always stands close to the machine, for easier handling and control.
- The cutting arm is reversible which lets you cut closer to walls or the ground. The drive belt has a fully sealed transmission. This keeps out cutting dust etc, reducing wear.
- Reduces wear and slippage risk.
- Compact design, low weight and correctly positioned handles make our machines easier to handle. Also, our anti-vibration system in the handles provides a more convenient handling during long shifts.
- DEX (Dust Extinguisher System)
- X-torq®
- Optimal ergonomics thanks to high power-to-weight ratio, low vibration levels (below 2.5 m/s²) and steplessly adjustable magnesium blade guard.
- Optimised engine performance and 5 % fuel savings through new efficient cylinder design, digital ignition system and X-Torq engine technology.
- Easy to start thanks to the digital ignition system, fast idle lock, in choke lever and improved starter grip.
- The DEX system provides superior dust control and less water and slurry, with a new-designed patent pending water valve allowing for progressive water flow adjustment.
- Reliable operation and minimal service requirements through Active Air Filtration™ and DuraStarter™.
- SmartCarb™ and built-in automatic filter compensation maintains high power and lowers fuel consumption.
- Blades with 20 mm and 25.4 mm (1") bore can be fitted thanks to the multi-fit blade bushing.

TECHNICAL SPECIFICATION	
Engine	Air-cooled 2 stroke engine
Cylinder displacement	4.48 cu.inch
Power output	5 hp
Fuel tank volume	30.4 fl oz
Idling speed	2700 rpm
Vibrations front handle	2.4/2.4 m/s ²
Vibrations rear handle	2.4/2.4 m/s ²
Sound pressure level at operators ear	101 dB(A)
Sound power level, guaranteed (LWA)	115 dB(A)
Blade diameter	12/14"
Max cutting depth	4/5"
Weight (excl. cutting equipment)	21.2/21.6 lbs
Fuel tank volume	1.9 US pint
